

RIDER | GUILLAUME LE BRECH

ABSOLUTE FREERIDE

The SCROSS deliver extremely early planing, and being compact also offers much more: control and forgiveness in all maneuvers. Speed jibes becomes a breeze.

The SCROSS line was inspired by the S Series for its speed but we also did use a lot of features and "building stones" from our Cross line. The result is a creation of a unique board fully in line with our slogan "Shaped for you".

Comfort and performance blends together, emphasizing the basis of our policy; The SCROSS delivers effortless high performance, - no need to be a super skilled pro sailor as the subtle lines of the shape will assist you in doing maneuvers and taking you to yet another "auto pilot" level of performance.

The top of the line construction. This construction integrates wood for better performance, stiffness and strength. The name of the game is minimum weight and maximum acceleration, and in combination with the soft rails - the package delivers a silky ride that you will never forget, - of course supported by our famous shock absorbers.

The shape is identical to SCrosss, built in durable MC construction and featuring monopads on half of the deck., this configuration is ideal for first time fun board sailors and consequently the ideal tool for rental outlets and even schools as the immediate step up from basic entry-level boards.

Equipped with added shock absorbers beneath the large monopads, the SCross MC becomes the ultimate tool for learning all the basic maneuvers as well as taking you for a comfortable, amazingly fast and exhilarating ride...

FEATURES

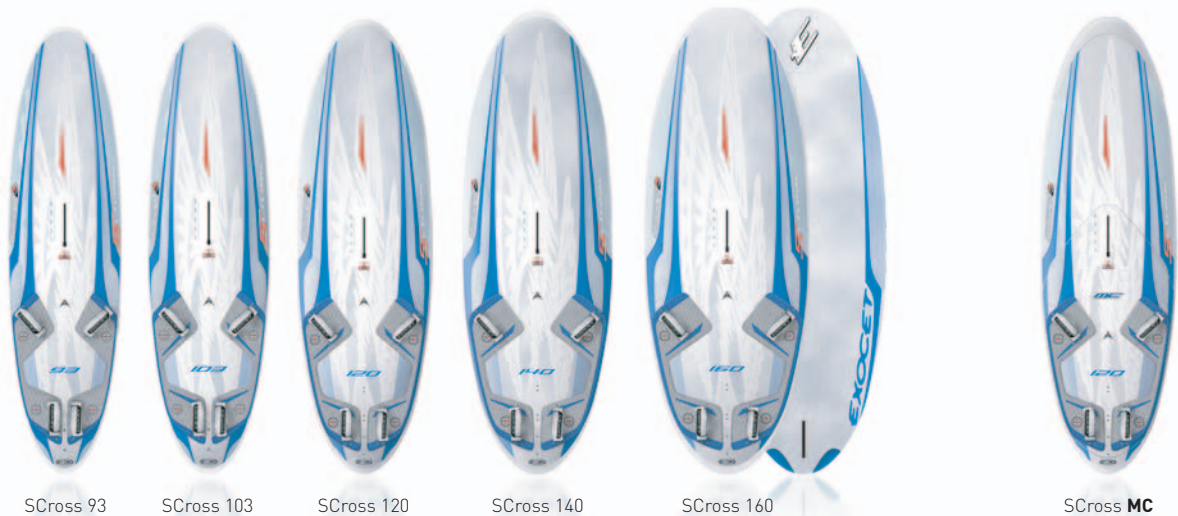

- **DDSA:** Double Density Shock Absorber
- **Full wood version**, blistering speed and easy jibing
- **MC** version with EVA Half deck, for max comfort and progressive sailing
